

CLTD: Certified in Logistics, Transportation and Distribution

(4 days seminar)

Introduction

Many organizations in today's environment are active on a worldwide basis with sourcing, assembling, manufacturing and distributing networks spanning the globe. This has led to an increased importance of the physical movement of raw materials, parts and finished products in today's supply chains. Also, the importance of managing the required documentation flows and compliance to various regulations has increased tremendously as items are being moved between continents and regions with different laws, requirements and regulations.

The Certified in Logistics, Transportation and Distribution (CLTD) is designed to provide individuals with a body of knowledge, best practices, technology know-how and standards to manage, execute and control the physical flow of items as well as the documentation flows required within their supply chain(s).

Seminar Content

The CLTD seminar equips individuals with the necessary knowledge, frameworks and terminology to manage the company's logistics, transportation, warehousing and distribution processes as well as the documentation flow required by focusing on the following topics:

- Logistics and Supply Chain Overview
- Capacity Planning and Demand Management
- Order Management
- Inventory and Warehouse Management
- Transportation
- Global Logistics Considerations
- Logistics Network Design
- Reverse Logistics and Sustainability

Key Learnings

Participants to the CLTD seminar learn to evaluate and improve logistic, warehousing, transportation and distribution activities within an organization's global operations framework. Furthermore, participants will be equipped with knowledge and best practices for today's logistic, warehousing, transportation and distribution challenges given the rapidly changing global environment. Next to that, participants will learn all aspects of managing, evaluating and improving the required documentation flows and to adhere to international regulations related to the physical and documentation flows. Participants will also learn the necessary common terminology and definitions in order to speak the same language in the logistic, warehousing, transportation and distribution area.

Seminar Didactics

The seminar consists of a mix of case studies, quiz questions, interactive role play, videos, business simulations, knowledge and best practice transfer via presentation. The seminars are delivered in English and all training materials are in English as well. Exercises to repeat the content, knowledge tests and other exercises during the session and at the end of each session, ensure, that the trainer receives an immediate feedback on the knowledge transfer success. The seminar is supported by a Supply Chain business simulation called The Fresh Connection (TFC). More information on the next page.

Target Audience

The CLTD seminar is designed for individuals working in all processes related to the physical movement and storage of raw materials, parts, subassemblies and finished goods within a company as well as processes related to the required documentation flows relevant to the movement and storage of items. Next to that the CLTD seminar is a requirement for all individuals who want to increase their insight and understanding about the interactions and interdependencies between the logistics, warehousing, transportation and distribution processes within the supply chain. Furthermore, the CLTD seminar is designed for all individuals who would like to obtain the designation Certified in Logistics, Transportation and Distribution (CLTD).

CLTD: Certified in Logistics, Transportation and Distribution

(4 days seminar)

Become Certified in Logistics, Transportation and Distribution (CLTD)

An official APICS exam must be taken to qualify as CLTD certified. A candidate who passes the CLTD exam will receive a personalized certificate *Certified in Logistics, Transportation and Distribution* and is entitled to use the acronym "CLTD" as a title.

About *The Fresh Connection*

The Fresh Connection

THE ULTIMATE VALUE CHAIN EXPERIENCE

With *The Fresh Connection* participants will be able to find lasting answers to many Supply Chain Management issues, by making strategic and tactic decisions within a Supply Chain. Learning by doing and comprehending the effects are the heart of this web-based business simulation for educational purposes, where the fruit juice company *The Fresh Connection* has got into trouble, despite its convincing products. There seems to be many weak points within the Supply Chain that the daily tasks become increasingly harder to manage. Unpredictable challenges pose big risks. Teams of four representing the roles purchasing, production, sales and supply chain have the exciting and demanding task to lead *The Fresh Connection* out of the red and to a positive Return on Investment (ROI). Participants are challenged to make the best tactical and strategic decisions for the company and experience that they not only need profound expert knowledge but also, a strong team!
