## "PMI Selfstudy & Exam Package"

The **PMI CSCP Selfstudy & Exam Package** is recommended to customers who want to prepare for the CSCP exam as a self-learner. The anticipated **preparation time** is about **70-100 hours**, depending on the learner's pre-knowledge and learning style. An **English B1 level (CEFR)** is required. The study time is mostly spent in the **APICS CSCP Online Learning system** (see information below). The CSCP designation is earned by successfully completing the **3,5-hour exam*** consisting of **150 multiple choice questions**. The exam is computer-based and can be taken at a local Pearson Vue test center or as proctored OnVue online exam from home or office. A **free retake** is provided in case of failure**. PMI offers **2x90 min online exam preparation sessions** (once a quarter) where an APICS trainer runs through practice questions with the participants in small groups. The one-year ASCM Membership with certification upgrate gives access to the largest network of supply chain professionals and exclusive resources. The CSCP Selfstudy & Exam package includes in total:

- Printed **APICS Textbooks** and the **APICS Participant Slidebook**
- One-year access to the **APICS CSCP Online Learning System**
- 2 x 90 minutes online "**Exam Preparation Session**"
- **APICS Exam Credit*** plus free "Second Chance" **retake exam****
- One-year **ASCM Membership with certification upgrade**
- Free participation (during one year after registration of your SelfStudy) at the keynote speeches during our **"Supply Chain Learning Days"**. Registration required!

Package price: 3.189€ excl. VAT (3.412,23€ incl. 7% VAT)
excl. shipment costs***

The **APICS CSCP Online Learning System** is a comprehensive professional development and exam preparation program. It consists of eight easy-to-understand modules, the APICS textbook pages, and web-based study tools that reflect the entire APICS Exam Content Manual (ECM). It provides learners with a broad view of global end-to-end Supply Chain Management. The web-based tools help learners to determine their initial level of knowledge, create a study plan based on the individual needs, reinforce the studies with practice tests, quiz questions and activities and track the learning progress through comprehensive reports.
